The Panasonic Lumix DMC-GH2: The Unofficial Quintessential Guide provides a wealth of information and professional insights for owners of this powerful HD camera. With its electronic viewfinder and interchangeable lenses, the GH2 is capable of not only recording professional-quality still images, but has the added ability to record HD video as well. The mirrorless design enhances the camera's versatility beyond that of most digital single lens reflex (DSLR) cameras. With the appropriate adapters, it can use virtually any manufacturer's manual focus, legacy lens. It is smaller than a typical DSLR in both size and weight, and retains automatic focusing while recording videos capability that is missing in many DSLR cameras. With the GH2, Panasonic has significantly expanded the video capabilities beyond those of previous models. Among the improvements is the ability to adjust the frame rate and shutter speed when filming video, giving users greater control over the movie-making process. In this guide, authors Brian Matsumoto and Carol F. Roullard explore and explain the features and capabilities of the GH2 camera in detail, as they cover everything from the basic features of the camera to numerous advanced photographic applications. The informative text is illustrated with example images throughout. Readers will learn how to: Control the most basic camera functions-focus and exposure Navigate the camera's menu system Achieve a range of artistic effects using various camera settings Use the camera's automated controls, and override those controls to obtain better exposure Use the GH2 in its video mode to obtain HD videos Post-process images and videos on a computer Expand the camera's use by mounting it on a telescope or microscope And much more...

Close-up and macro photography is one of the most popular types of photography among digital photographers today. After the big-range zoom, a macro lens is typically one of the next purchases considered by serious outdoor photographers and amateur photographers looking for close-up capability in all zoom lenses. Yet hobbyist photographers struggle. Many macro shots just don ' t make it-not sharp, confusing backgrounds, muddled compositions, misplaced sharpness, and distracting light. Even more advanced photographers find challenges working with depth of field, dealing with light, and using different focal lengths up close. You need a book that goes beyond the camera manuals to teach you how to select and use various lenses to take great macro shots. This guide by pro photographer Rob Sheppard will help you conquer the fundamentals and capture stunning pictures. Sheppard starts with the basics. He discusses factors such as depth of field, perspective, and compression and which types of lenses are right for your style of shooting. You will have a better understanding of your equipment and understand your choices for investing in lenses. Beautifully illustrated with large, compelling photos, this book teaches you how to take control of your photography to get the image you want every time you pick up the camera.

AFS or AFC? Constant Preview on or off? Self Timer or Shutter Delay? AVCHD or MP4(LPCM)?The Panasonic GH5 Micro Four Thirds camera is the most advanced and capable stills/ video hybrid produced to date. The GH5's menu system is well presented and logically laid out but with over 200 main menu items, most with their own sub menus it could never be simple to master.Many photographers faced with this seemingly endless array of options, never fully get to grips with it. That needn't be you. This book offers a blow by blow explanation of the menu items, what they do and why you might want to utilize them, in non-technical language. The last chapter goes through every menu item in order and tells you how the author has his camera set up. You can simply copy these settings to your GH5 and within a few minutes be out and about taking pictures with confidence. As time goes by with the help of this book you will finish up with a GH5 tailored to your own way of working, not only a supremely capable camera but a joy to use as well.

The G9 is Panasonic's first top of the line camera specifically designed for stills rather than being a stills/ video hybrid. With 60fps burst shooting, class leading stabilization, a user configurable menu system, 80Mp High Resolution mode and many other high end features it is of necessity a complex camera. As with any digital camera the heart of the machine is the menu system, consisting of around 180 entries, many with their own sub menus offering many hundred of options. It is no surprise then that even experienced users can find themselves scratching their heads as they wade through the mass of options.. This book goes through each and every every menu choice and explains what it does and why you might want to do it. It doesn't try to teach you photography. You wouldn't have chosen a G9 if you didn't already have some expertise. What my books aims to do is to familiarise yourself with the G9 and learn to tailor it to your own taste and needs. Having done that, you I think you will find using the G9 not only a pleasure but inspiring as well.

The Panasonic Lumix DMC-FZ1000 is a camera from a trusted company. The camera has many features that allow the user to experience taking pictures in different settings depending on the expected outcome. The camera allows the user to control the shutter speed, aperture value, ISO sensitivity and other functions to accommodate the different settings of the subject. The user can also manipulate the outcome of the images through the filters that are found in the menu. This guide will help the seasoned and the amateur photographers access all the functions of the camera.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

What's the difference between Self Timer and Shutter Delay? Between AFS and AFF? How can Disp.Style change your viewing experience?The menu system of the Panasonic GX80 (GX85 in the USA) is one of the best presented and most logically laid out of any digital camera. But with 33 pages containing 151 items, many with their own sub-menus, the manual for the GX80 is labyrinthine. Many photographers faced with this, one of the most sophisticated digital cameras ever produced with its seemingly endless array of options, never fully get to grips with it. That needn't be you.This book offers a blow by blow explanation of the menu items, what they do and why you might want to utilize them, in non-technical language. Its aim is not to teach you photography but how to use the GX80 as a finely tuned tool for your image making.The last chapter goes through every menu item in order and tells you how the author has his camera set up. You can simply copy these settings to your GX88 and within a few minutes be out and about taking pictures with confidence.

Khalik Allah is a New York–based photographer and filmmaker whose work has been described as "street opera," simultaneously penetrative, hauntingly beautiful, and visceral. His photography has been acclaimed by the New York Times, TIME Light Box, the New Yorker, the Guardian, the Village Voice, the BBC, and the Boston Globe. Since 2012, Allah has been photographing people who frequent the corner of 125th Street and Lexington Avenue in Harlem. Shooting film at night with only the light pouring from storefront windows, street lights, cars, and flashing ambulances, he captures raw and intimate portraits of "souls against the concrete." This volume presents a gallery of 105 portraits created with a Nikon F2 35mm camera and a photography predicated on reality. Inviting viewers to look deeply into the faces of people living amid poverty, drug addiction, and police brutality, but also leading everyday lives, Allah seeks to dispel fears, capture human dignity, and bring clarity to a world that outsiders rarely visit. This nuanced portrayal of nocturnal urban life offers a powerful and rare glimpse into the enduring spirit of a slowly gentrifying Harlem street corner and the great legacies of black history that live there.
