L'osteoporosi è una complessa condizione patologica che può presentarsi in tutte le fasce di età, alla cui insorgenza concorrono molteplici fattori. Ne deriva pertanto la necessità di una rigorosa conoscenza eziopatogenetica fondamentale, oltre che clinica e diagnostica. Le conoscenze sempre più avanzate nel campo del metabolismo osseo, della clinica e farmacologia, hanno condizionato e reso necessario un adeguamento tecnico da parte dei medici specialisti ed in particolare del radiologo, in passato focalizzato sul solo aspetto diagnostico e oggi sempre più proiettato verso nuove prospettive di studio. L'opera si articola in sei parti distinte: dalla biologia, istologia e fisiopatologia del tessuto osseo (Parte I) si passa alla semeiotica, epidemiologia, fattori di rischio e prevenzione dell'osteoporosi (Parte II) e successivamente alla fisiopatologia, genetica e clinica dell'osteoporosi e delle malattie metaboliche dell'osso (Parte III). Di significativo impatto risulta la Parte IV, focalizzata sui diversi aspetti diagnostici dell'osteoporosi (diagnostica clinica, radiologica e di medicina nucleare) e resa ancora più preziosa da un'eccellente iconografia, quanto mai dimostrativa e scelta con rigorosa cura. Nella Parte V e nella Parte VI vengono infine trattati rispettivamente la terapia e le complicanze ortopediche e riabilitazione fisica. Si tratta di un testo chiaro, caratterizzato da una bibliografia precisa e aggiornata e da un'iconografia curata nei minimi particolari, da cui traspaiono l'esperienza e l'elevata capacità didattica degli Autori, sicuramente utile e interessante per tutti coloro che nell'ambito della propria attività professionale hanno necessità di approfondire le tematiche inerenti l'osteoporosi e le malattie del metabolismo osseo.

Tallinn Manual 2.0 expands on the highly influential first edition by extending its coverage of the international law governing cyber operations to peacetime legal regimes. The product of a three-year follow-on project by a new group of twenty renowned international law experts, it addresses such topics as sovereignty, state responsibility, human rights, and the law of air, space, and the sea. Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.

The 4 1/2 litre Bentley is one of the most iconic pre-war cars, and the super charged 4 1/2 litre "blower" Bentley is today one of the most sought-after and most valuable cars for collectors. The "Bentley Boys" won several high-profile races in Bentleys, and Woolf Barnato

and Bernardo Rubín won with a 4 1/2 litre car in 1928. Five supercharged "Blower" Bentleys were built to compete at Le Mans, but the car's Achilles Heel was its reliability, and it never won the 24-hour race. This Manual provides details of the 4 1/2 litre unsupercharged and "Blower" Bentley racing cars, detailing their period racing history, anatomy and engineering, and provides an insight into owning, maintaining, and running an example of this iconic car today. Illustrated with period photographs and design and engineering material, plus photographs of restored examples in use today.

The result of a three-year project, this manual addresses the entire spectrum of international legal issues raised by cyber warfare.

A Vietnam veteran and career veterans' counselor who struggles with post-traumatic stress (PTS) tells how to recognize the symptoms of PTS and how to begin the healing process. The veteran and those who care about him/her must understand that: - he/she is not alone in this struggle - and that he/she is not crazy. Post-traumatic stress is a sane person's reaction to intense or protracted violence. We learn to control the anxiety, hypervigilance and behaviors that tend to interfere with making a living, studying and social functioning. Making peace with post-traumatic stress means understanding the nature

of the beast that followed you home, and knowing what triggers PTS symptoms in you. Making peace means seeking help from Department of Veterans Affairs caregivers who will give you the tools to deal with PTS. The author tells you what to expect from VA Vet Centers, VA Mental Health Clinics, and the trained people who are there to help you. Additionally, we find that we must make peace with those who love us, with the buddies we left behind, and even with ourselves. The author gives personal insights into these issues. He also draws from personal experience to give practical advice to younger veterans on job searches, education, family financial management, and the veteran's role in the American political process. Although money is not a cure for post-traumatic stress, the author walks you through the process of claiming PTS (and other conditions) as VA-recognized disabilities for VA compensation. Examples of stressor statement forms that resulted in successful compensation claims are provided. For Vietnam veterans, an appendix provides information on Agent Orange claims.

The book provides a clear framework for managers to improve the onboarding process. The authors have developed an easy to use model and process for onboarding which maps out 6 dimensions which can be used to design and implement a systematic organizational process.

The Fifty-Year Wound is the first cohesively integrated history of the Cold War, one replete with important lessons for today. Drawing upon literature, strategy, biography, and economics -- plus an inside perspective from the intelligence community -- Derek Leebaert explores what Americans sacrificed at the same time that they achieved the longest great-power peace since Rome fell. Why did they commit so much in wealth and opportunity with so little sustained complaint? Why did the conflict drag on for decades? What did the Cold War do to the country, and how? What was lost while victory was gained? Leebaert has uncovered an astonishing array of never-published documents and information, including major revelations about American covert operations and Soviet military activities. He has found, in the shadows of one of this century's great, epic stories, the sort of details and explanations that hit with the force of a lightning bolt and will change forever the way we think about our past.
