Similarity Transformation Examples. Below are two rectangles, spaced far apart and in different orientations. Rectangles BATH has long sides of 30 yards and short sides of 21 yards. MUCK have long sides of 40 yards and short sides of 28 yards. You need not worry about corresponding interior angles (they are all 90°).

congruent, and then we are left to determine the congruence transformation that will map one to the other. If ϕ is a similarity transformation, then ψ is the composition of basic rigid motions and dilations. The scale factor k of ψ is the product of the scale factors of the dilations in the transformation.
