Autonomic ganglion. Hence it has only preganglionic neurons not postganglionic neurons. Answer is FALSE.

## Sympathetic vs. Parasympathetic Nervous System Quiz ...

Autonomic nervous system, in vertebrates, the part of the nervous system that controls and regulates the internal organs without any conscious recognition or effort by the organism. The autonomic nervous system comprises two antagonistic sets of nerves, the sympathetic and parasympathetic nervous systems. The sympathetic nervous system connects the internal organs to the brain by spinal nerves.

Nervous System Concept Map  
Answers | [voucherslug.co](http://voucherslug.co)

The nervous system is also  
divided functionally in terms of  
motor activities into the somatic  
and autonomic divisions. It is  
important, however, to recognize  
that these classifications are made  
for the sake of convenience and  
that the nervous system acts in an  
integrated manner both  
structurally and functionally.
