Treatment depends upon the type of burn. Usually a first-degree or a mild second-degree burn can be treated at home. For a mild burn,

# Get Free Burn Care And

put the skin in cold water for 5 to 10 minutes. Gently wash the burn with warm soapy water.

~~Burn Care - What  
You Need to Know~~

A basic understanding of burn wound treatment can reduce pain and facilitate healing of

all four types of  
burns. Burns are  
specifically  
damage caused to  
one or multiple  
layers of skin and  
flesh by external  
sources such as  
heat or chemicals,  
and range in  
severity from minor  
to major.

## ~~Treatment A~~ Wounds 101: From Minor to Major Injuries ~~Practical Guide~~

A burn is an injury caused by exposure to thermal (heat), chemical, electrical, or radiation energy. A scald is a burn caused by contact with a hot liquid or steam. Most burns

# Get Free Burn Care And

are non-complex  
(previously  
described as 'minor  
burns') and can be  
managed in  
primary care.

Complications of  
non-complex burns  
include:
