~~Change Your Body, Change the World: Reflections on Health ...~~

Using a few simple tweaks in body language, Harvard researcher Amy Cuddy has shown that you can change your body chemistry within 2 minutes to make you more confident and powerful and less stressed. We all know that the mind influences our body, but research now shows that the connection works both ways.

~~Change Your Body, Change Your Mood - Completed Thoughts~~

When you start to exercise regularly, your body actually starts to grow more mitochondria in your cells. Research shows that you could actually have as many as 50 percent more mitochondria in your body after just six to eight weeks of regular exercise. This makes your body better at quickly producing energy — and can make exercise feel easier.
