Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The Tenth Edition includes many exciting new research findings as well as an enhanced Connect Finance, now with even more student learning resources. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Ross, Essentials of Corporate Finance 10e focuses on what undergraduate students with widely varying backgrounds and interests need to take away from a core course in business or corporate finance. The goal is to convey the most important concepts and principles at a level that is approachable for the widest possible audience. To achieve this goal, subjects are distilled down to the bare essentials, while retaining a decidedly modern approach to finance. In addition, understanding the "why" is just as important, if not more so, than understanding the "how" - especially in an introductory course. Readability and pedagogy are key throughout Essentials 10e. The text is written in a relaxed, conversational style that invites the students to join in the learning process rather than being a passive information absorber. The new edition downplays purely theoretical issues and minimises the use of extensive and elaborate calculations to illustrate points that are either intuitively obvious or of limited practical use. There are 3 basic themes visible throughout the book: emphasis on intuition/common sense, a unified valuation approach, and a managerial focus.

Fundamentals of Corporate Finance's applied perspective cements students' understanding of the modern-day core principles by equipping students with a problem-solving methodology and profiling real-life financial management practices--all within a clear valuation framework. KEY TOPICS: Corporate Finance and the Financial Manager; Introduction to Financial Statement Analysis; The Valuation Principle: The Foundation of Financial Decision Making; The Time Value of Money; Interest Rates; Bonds; Valuing Stocks; Investment Decision Rules; Fundamentals of Capital Budgeting; Risk and Return in Capital Markets; Systematic Risk and the Equity Risk Premium; Determining the Cost of Capital; Risk and the Pricing of Options; Raising Equity Capital; Debt Financing; Capital Structure; Payout Policy; Financial Modeling and Pro Forma Analysis; Working Capital Management; Short-Term Financial Planning; Risk Management; International Corporate Finance; Leasing; Mergers and Acquisitions; Corporate Governance MARKET: Appropriate for Undergraduate Corporate Finance courses.

The best-selling Fundamentals of Corporate Finance (FCF) has three basic themes that are the central focus of the book: 1) An emphasis on intuition--the authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics. 2) A unified valuation approach--net present value (NPV) is treated as the basic concept underlying corporate finance. 3) A managerial focus--the authors emphasize the role of the financial manager as decision maker, and they stress the need for managerial input and judgment. The Tenth Edition continues the tradition of excellence that has earned Fundamentals of Corporate Finance its status as market leader. Every chapter has been updated to provide the most current examples that reflect corporate finance in today's world. The supplements package has been updated and improved, and with the enhanced Connect Finance and Excel Master, student and instructor support has never been stronger. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.
