The International Mathematical Olympiad (IMO) is a competition for high school students. China has taken part in the IMO 21 times since 1985 and has won the top ranking for countries 14 times, with a multitude of golds for individual students. The six students China has sent every year were selected from 20 to 30 students among approximately 130 students who took part in the annual China Mathematical Competition during the winter months. This volume comprises a collection of original problems with solutions that China used to train their Olympiad team in the years from 2006 to 2008. Mathematical Olympiad problems with solutions for the years 2002?2006 appear in an earlier volume, Mathematical Olympiad in China.

From the students at the Yale Daily News, a book that highlights the essays that got students into Yale University, helping high school seniors get into the school of their choice The competition to get into a top-tier school becomes more and more fierce every year. Parents and students are searching for the best advice, and the final question they ask after joining clubs in high school and keeping the grades up is: How do I write a winning essay? 50 Yale Admission Success Stories and the Essays that Made Them Happen shows college applicants how to do exactly that, showcasing the Common App essays that got students into Yale, in addition to Yale-specific application essays and other supplemental aspects of the Yale application, like short statements and short answers. But this book does more than just show students what kind of essays got college students through the door; it profiles each student who contributed to the collection and puts those essays into context. We meet Edgar Avina, a political science major from Houston who worked odd jobs to support his family, who immigrated from Mexico. Madeleine Bender, a New York City native, is a "jack of all trades" who writes for the Daily News, plays clarinet for a concert band, and majors in both Classics and Ecology & Evolutionary Biology. These profiles set this book apart from other college essay books, reminding students that in order to write a strong essay, you must be yourself and understand how the university you're applying to will help you make your greatest dreams into a reality.

This established text is the only introduction to qualitative research methodologies in the field of library and information management. Its extensive coverage encompasses all aspects of qualitative research work from conception to completion, and all types of study in a variety of settings from multi-site projects to data organization. The book features many case studies and examples, and offers a comprehensive manual of practice designed for LIS professionals. This new edition has been thoroughly revised and includes three new chapters. It has been updated to take account of the substantial growth in the amount and quality of web-based information relevant to qualitative research methods and practice, and the many developments in software applications and resources. The authors have identified a clear need for a new chapter on the evaluation of existing research, as a gateway into new research for information professionals. The final chapter, 'Human Resources In Knowledge Management', takes the form of a model case study, and is an 'ideal' qualitative investigation in an information setting. It exemplifies many of the approaches to qualitative research discussed in earlier chapters. Readership: Directed primarily at the beginner researcher, this book also offers a practical refresher in this important area for the more experienced researcher. It is a useful tool for all practitioners and researchers in

information organizations, whether libraries, archives, knowledge management centres, record management centres, or any other type of information service provider.

Self-esteem is essential for our survival. Without some measure of self-worth, life can be enormously painful, with many basic needs going unmet. One of the main factors differentiating humans from other animals is the awareness of self: the ability to form an identity and then attach a value to it. In other words, you have the capacity to define who you are and then decide if you like that identity or not. The problem of self-esteem is this human capacity for judgment. It's one thing to dislike certain colors, noises, shapes, or sensations. But when you reject parts of your self, you greatly damage the psycho logical structures that literally keep you alive. Judging and rejecting your self causes enormous pain. Since its first publication in 1987, Self-Esteem has become the first choice of therapists and savvy readers looking for a comprehensive, self-care approach to improving self-image, increasing personal power, and defining core values. More than 600,000 copies of this book have helped literally millions of readers feel better about themselves, achieve greater success, and enjoy their lives to the fullest. You can do it, too!
