The 2012 International Symposium on Management Intelligent Systems is believed

to be the first international forum to present and discuss original, rigorous and significant contributions on Artificial Intelligence-based (AI) solutions—with a strong, practical logic and, preferably, with empirical applications—developed to aid the management of organizations in multiple areas, activities, processes and problem-solving; i.e., what we propose to be named as Management Intelligent Systems (MiS). The three-day event aimed to bring together researchers interested in this promising interdisciplinary field who came from areas as varied as management, marketing, and business in general, computer science, artificial intelligence, statistics, etc. This volume presents the proceedings of these activities in a collection of contributions with many original approaches. They address diverse Management and Business areas of application such as decision support, segmentation of markets, CRM, product design, service personalization, organizational design, e-commerce, credit scoring, workplace integration, innovation management, business database analysis, workflow management, location of stores, etc. A wide variety of AI techniques have been applied to these areas such as multi-objective optimization and evolutionary algorithms, classification algorithms, ant algorithms, fuzzy rule-based systems, intelligent agents, Web mining, neural networks, Bayesian models, data warehousing, rough sets, etc. The symposium was organized by the Soft Computing and Intelligent Information Systems Research Group (<http://sci2s.ugr.es>) of the University of Granada (Spain) and the Bioinformatics, Intelligent System and Educational Technology Research Group (<http://bisite.usal.es/>) of the University of Salamanca (Spain). The present edition is held in Salamanca (Spain) on July 11-13, 2012.

Fundamentals of Writing is a book written specifically for those who want to improve their writing skills and apply them to writing articles (for newspapers, magazines, and corporate publications), media releases, case studies, blog posts and social media content. The book is based on several writing courses that I teach online for University of Toronto continuing education students and for private students and corporate clients. And it is filled with samples, examples and exercises to get you writing. Fundamentals of Writing is for you if you are looking to do any of the following: become a more effective writer; organize your thoughts before you write; write for a defined audience; make your points in a clear, concise, focused manner. My hope is that this book will help you effectively structure your written communication when writing articles, media releases, case studies, blog posts and social media content.

Do you find yourself feeling blank when you face the blank page? Do you have a lot to say but don't know where to, or how to, start? Do you suspect your writing tends to go on too long and is not as organized or as focused as it could (or should) be? Have you ever used ASAP in an email message? Do you want to write more effective email messages, letters, proposals or reports? Do you want to write in a more effective and efficient manner? If you answered yes to any of the above questions, Harness the Business Writing Process is for you. This comprehensive business writing book: introduces you to the writing process, shows you how to eliminate the blank page before you write, shows you how to (and why to) capture attention, maintain interest, and influence attitude - before you ask for action, helps you quickly outline and write short messages, helps you structure and outline long documents and write them in manageable chunks, helps you define (and start with) your purpose, includes sample e-mails, letters, and other documents,

includes a number of editing and proofreading hints and tips.
