Using compelling contemporary and classic cases, CASE STUDIES IN PSYCHOTHERAPY brings to life essential concepts and practices in psychotherapy. The Seventh Edition of this popular casebook features intriguing new cases added to illustrate Psychoanalysis, Client-Centered Therapy, Existential Therapy, Interpersonal Therapy, Contemplative Therapies, and Therapy in a Multicultural context. There's also an entirely new chapter on Positive Psychotherapy. The book maintains its parallel structure with the Tenth Edition of Wedding and Corsini's CURRENT PSYCHOTHERAPIES, providing you with the most comprehensive look at psychotherapy available today. All of these insightful cases are chosen for intrinsic interest, clarity of presentation, and the ability to most effectively demonstrate the basic techniques and methods of the theory being illustrated. The aim of this book on psychotherapies with children and families is to present a comprehensive overview of the current array of intervention approaches in the child mental health field. There is a focus on the integration of theory, research, and practice throughout the book. The book proceeds from the more global pre sentations of basic theoretical approaches to applications of these approaches with specific problems and populations. It then presents more integrated intervention approaches and overviews of the research literature. One of the unique features of this book is its focus on future directions for each approach, both in clinical practice and in research. A second unique feature is its structured format across diverse approaches with a focus on empirical validation of approaches. Another innovation is the presentation of interventions that integrate major components of different theoretical approaches. Thus, the book reflects the current trends in the field of interventions with specific problems and populations, empirical validation of the approach, and the integration of treatment approaches. There are five major sections in this book. Part I consists of four chapters that address a variety of issues related to child psychotherapy. Chapter 1 by the editors examines the historical roots of child psychotherapy and explores current trends in the treatment of diverse child disorders. It emphasizes the movement to "treat ments that work" and sets the stage for the chapters that follow.

In this book, Jean Mercer evaluates a series of unconventional and potentially harmful psychological treatments that are rarely mentioned in the profession's literature. Mercer guides readers to an understanding of alternative psychotherapies that will help them advise clients with respect to existing and newly-emerging unconventional treatments.

This book provides an overview of the foundations of Chinese psychotherapy, based on a full consideration of Confucian, Taoist, and Buddhist teachings. Serving as a reliable and practical guide to coping with life's adversities, the book offers therapeutic techniques to guide clinical practice based on the potential mutual enrichment of these teachings and current psychotherapies, research, and practice. It aims to guide readers towards authentic, durable happiness with novel approaches to a variety of mental health problems. Among the topics addressed: Cultural heritages and mental health Confucian, Taoist, and Buddhist techniques for self-enlightenment psychotherapy Psi mechanisms and related training models Foundations of Chinese Psychotherapies combines modern clinical methods and traditional teachings to form a unique approach to mental health and well-being. It will be a valuable resource for mental health professionals and others who seek to intervene in a variety of mental health problems. "A systematic introduction to indigenous Chinese psychotherapy is long overdue.Explicating human nature as envisioned by traditional Chinese thinkers, this book is a timely answer to the increasingly contested question of what it means to be human in an era when gene editing keeps tinkering nature's design. " Louise Sundararajan, Ph.D., Ed.D., Fellow of the American Psychological Association; Chair and founder of the Task Force on Indigenous Psychology. "This is an important book. It builds on the work of K.-S. Yang and K.-K. Hwang in their hope for an indigenous Chinese psychology. This book is the next installment in that progression. The world-wide community of scholars needs to know what an indigenous psychology looks like that is sensitive to the insights of Confucianism, Buddhism and Taoism. This book makes that contribution and it is my hope that it will be widely read." Alvin Dueck, PhD, Distinguished Senior Professor of Psychology, Fuller Graduate School of Psychology, USA Foundations of Chinese Psychotherapies is a valuable introduction to how the Confucian, Taoist, and Buddhist traditions understand the human psyche, and in particular psychic abilities. Yung-Jong Shiah has a unique perspective on these topics, having been trained in both Eastern and Western traditions, and through his deep familiarity with how science has been used to study these intriguing topics. " Dean Radin MS PhD, Chief Scientist, Institute of Noetic Sciences, USA and author Real Magic (2018) and other books.

Here's an evidence-based, holistic approach to caring for psychiatric and mental health patients in outpatient settings. Using a biopsychosocial model, this text addresses mental health issues through stabilization of brain chemistry, individualized psychotherapy, and re-socialization into the community. Inside, you'll find an in-depth focus on specific psychiatric disorders including the epidemiology, etiology, biological basis, clinical presentation of adults, older adults, and children, co-morbidities, differential diagnosis, and treatment. There is also comprehensive coverage of the interventions and "Levers of Change" used to aid patients in their recovery, as well preventative interventions.
