Locality and Belonging provides an international overview of the close relationship between territory and cultural identity. The issue of 'belonging' has long been recognized as crucial to the study of identity within anthropology. Here, contributors from Sweden, Norway, the Netherlands, France and the UK present rigorous case studies of 'belonging' from the UK, South Africa, Argentina, Zanzibar, Amazonia, Indonesia and West Africa. Among the themes explored are: \* space, memory and ethnicity \* the mnemonic use of objects \* mythologies of football and history \* use of 'natural features' of the environment \* nationhood and post-colonial identity making.

IT technology engineering changes everyday life, especially in Computing and Communications. The goal of this book is to further explore the theoretical and practical issues of Future Computing and Communications. It also aims to foster new ideas and collaboration between researchers and practitioners.

Her neighbors in Dry Creek, Montana, think Gracie Stone is rebuilding her life just fine on the family ranch. But Calen Gray knows better. Foreman of nearby Elkton Ranch, Calen has been sweet on Gracie half their lives. But harrowing circumstances kept them apart—and sent Gracie away. Now she's back, barely holding her head up, and refusing to believe she has a second chance at happiness. With faith, love and the gentle airing of long-held secrets, Calen just might find a way to bring back her smile—forever.

"Inspired by the true story behind Jackie Kennedy's iconic outfit, Kelby has stitched a compelling tale of politics, fashion and history." -- People On November 22, 1963, Jacqueline Kennedy accompanied her husband to Dallas dressed in a pink Chanel-style suit. Much of her wardrobe, including the pink suit, came from the New York boutique Chez Ninon where a young Irish immigrant named Kate worked behind the scenes to meticulously craft the memorable outfits. Kate is torn between the glamorous world of Chez Ninon and her traditional Manhattan neighborhood. Finding balance is not easy in a time when women are still expected to follow the rules. And when you're in love, it's impossible. Kelby's luxurious narrative gives fascinating insight into the real story behind the iconic pink suit, introducing the reader to the wildly unforgettable characters that made Jackie Kennedy into the fashion icon of the century.

Presenting an overview of the use of Phase Change Materials (PCMs) within buildings, this book discusses the performance of PCM-enhanced building envelopes. It reviews the most common PCMs suitable for building applications, and discusses PCM encapsulation and packaging methods. In addition to this, it examines a range of PCM-enhanced building products in the process of development as well as examples of whole-building-scale field demonstrations. Further chapters discuss experimental and theoretical analyses (including available software) to determine dynamic thermal and energy performance characteristics of building enclosure components containing PCMs, and present different laboratory and field testing methods. Finally, a wide range of PCM building products are presented which are commercially available worldwide. This book is intended for students and researchers of mechanical, architectural and civil engineering and postgraduate students of energy analysis, dynamic design of building structures, and dynamic testing procedures. It also provides a useful resource for professionals involved in architectural and mechanical-civil engineering design, thermal testing and PCM manufacturing.

This book is the first comprehensive assessment of the state of low-carbon investments in Asia, analyzing the rationales, mandates and public-private financing activities. Based on the experiences of several regional initiatives wherein public financing is catalyzing private investments in low-carbon infrastructure, this book proposes a framework that can be used as a tool to identify factors that influence private investment decisions and policy instruments that can scale up the private capital. Placing the Asian economies onto a low-carbon development pathway requires an unprecedented shift in investments. This book addresses this situation by asking questions such as: • What is the central role of private finance in achieving the Paris Agreement targets? • What key policy levers and risk mitigation can governments use in an effort to unlock the potentials of private capital? • How can regionally coordinated actions hold significant promise for scaling up private investments?
