## 1. Physiology and Biochemistry of Insect Hormones

CHEMICALS BASED ON ENDOCRINE and nervous system □ In insects, virtually all life processes are regulated by neural and endocrine systems. □ Basically Three types of hormones a) Brain hormones b) Moulting hormones c) Juvenile hormones □ These hormones are involved in the life processes of insects and regulating insect development, so studying of these can be utilized for insect pest control.

## Lecture 15: Endocrine & Exocrine glands in insects

In insects, neurosecretory cells are numerous and have important functions. Recent work has revealed that there are two types of neurosecretory cells: type A which stain with para-aldehyde fuchsin, and type B which do not. All cells possess electron dense granules.

## Endocrine Glands in Insects - Zoology Notes

Once an insect reaches the adult stage, its prothoracic glands atrophy (wither away) and it will never molt again. Prothoracic glands produce and release ecdysteroids only after they have been stimulated by another chemical messenger,

## 15. introduction to endocrinology - SlideShare

Several reviews of ILP endocrinology provide an extensive collation of earlier studies and their significance for insects and other invertebrates (Smit et al., 1998, Claeys et al., 2002, Wu and Brown, 2006, Gronke et al., 2010).

## Function ...

Endocrine glands controlled by central NSCs are the sinus gland (sgl), postcommissural organ (pcoo), and pericardial organ (peo), the latter possibly homologous to the insect corpora cardiaca. The Y-gland (Y) produces ecdysone and represents a homolog of the insect prothoracic gland; likewise, the mandibular organ (mo) secretes methyl farnesoate which is chemically and functionally similar to ...

## [Insect Endocrinology | ScienceDirect](#)

Insect physiologists suspect that brain hormone is bound to a larger carrier protein while it is inside the neurosecretory cell, and some believe that each cluster of cells may produce as many as three different brain hormones (or hormone-carrier combinations).
