Lavender: The Genus Lavandula - Google Books

Lavandula x intermedia (which is also known by the name Lavandula hybrida) is the variety of lavender commonly called “ lavandin. ” Lavandin is a naturally occurring hybrid between two lavender species: Lavandula angustifolia (see above) and Lavandula latifolia (a.k.a “ Spike Lavender ” - a pungent-smelling lavender native to Mediterranean Europe). Lavandin is especially known for producing a LOT of essential oil, up to 10x more than English lavender!

Lavandin versus Lavender: What's the Difference? | The Mad ...

Lavender, (genus Lavandula), genus of about 30 species of the mint family (Lamiaceae), native to countries bordering the Mediterranean. Lavender species are common in herb gardens for their fragrant leaves and attractive flowers. The plants are widely cultivated for their essential oils, which are used to scent a variety of products.
