really no more time for games and riddles. We only have time now for the plain truth. Some have asked why present this course as a book? Why not make a video course or some other digital format that is more popular in these times? And the reason for this is quite simply: time. I have been around long enough to see many

things come and go, and  
my senses have become  
keen enough to see some  
of the intricacies of this  
world. Through such  
experience and  
perceptions, I have seen  
things peak and wane,  
and I have seen many  
things lost within the  
medium of time. Videos  
and digital formats  
require a complex system  
to work and be

maintained, and such complex systems are usually the first to fall or change when exposed to the brutal torrents and extreme pressures of time. But a print book (as well as an eBook for your convenience), that is something that you can keep in your personal library for a lifetime with only moderate care. And history has shown us that

a simple book can outlast  
even whole civilizations.

Standing Bear, a Ponca

A continually evolving discipline, human reliability assessment (HRA) has elements of controversy from the definition of terms to the application of appropriate methods for the representation of human failure probability. The idea that
