Designed in the 1950s to operate on long-distance routes, the four-jet Vickers VC10 saw service with BOAC and a number of other airlines from the 1960s to 1981. It enjoyed a further career with the RAF as a strategic transport and later as an aerial refuelling aircraft. The last VC10 K3 tanker was retired by the RAF in 2013. Keith Wilson examines the design, construction and use of the VC10, using as his centrepiece ex-RAF VC10 C1K (XR808) and VC10 K3 (ZA147) tankers at Bruntingthorpe, Leicestershire.

This is a manual about the construction of 60163 Tornado, the new steam locomotive that has been making its first public runs in recent months. The locomotive has been built by the A1 Steam Locomotive Trust, a charitable trust founded in 1990 to build Tornado and possibly further locomotives. Tornado was conceived as an evolution of the LNER Peppercorn Class A1 class, incorporating improvements likely had steam continued, and changes for cost, safety, manufacturing and operational benefits, while replicating the original design's sound and appearance. Tornado, completely new-built, is considered the 50th Peppercorn A1, numbered next in the class after 60162, Saint Johnstoun, built in 1949. The 49 original Peppercorn A1s were built in Doncaster and Darlington for the London and North Eastern Railway (LNER). Tornado was built in the trust's Darlington works. The original 49 locomotives were scrapped by 1966 after an average service of 15 years. None survived into preservation, and Tornado fills a gap in the classes of restored steam locomotives that used to operate on the East Coast Main Line.
