evolution of the Jewish religion from the period leading up to the Exodus to the establishment of Jewish kingdoms in eastern and central Europe during the Middle Ages - a period of about 2500 years. It describes the influence of other religions on Judaism and the influence of Judaism on other monotheistic religions. In particular, the evolution of Christianity from a Jewish sect to an independent religion is described.

Is it possible that civilization has been in the Americas for tens of thousands of years? More and more scientifically enlightened readers want to know what effect new sciences and new discoveries have had on our interpretation of ancient sites. What part have myths and tales of

cataclysms played in our past, and what they may hold for the future? 'Atlantis in America', an intensive examination of the archeological sites of the Americas, reveals answers to some of these intriguing questions.

The Dictionary Of Americanisms, Canadianisms, Briticisms and Australianisms is a complete, modern, and comprehensive dictionary featuring a large word list of more than 20000 entries. The purpose of this book is to provide a generous sampling of words and expressions of the various spheres of life in the USA, Great Britain, Australia and Canada during the last centuries. The dictionary also features a collection of slang and colloquial expressions in these four countries in the twentieth century. It has a clear, easy-to-use

In this 2018 New York Times Notable Book, Paige Williams "does for fossils what Susan Orlean did for orchids" (Book Riot) in her account of one Florida man's reckless attempt to sell a dinosaur skeleton from Mongolia--a story "steeped in natural history, human nature, commerce, crime, science, and politics" (Rebecca Skloot). In 2012, a New York auction catalogue boasted an unusual offering: "a superb Tyrannosaurus skeleton." In fact, Lot 49135 consisted of a nearly complete T. bataar, a close cousin to the most famous animal that ever lived. The fossils now on display in a Manhattan event space

had been unearthed in Mongolia, more than 6,000 miles away. At eight-foot high and twenty-four feet long, the specimen was spectacular, and when the gavel sounded, the winning bid was over \$1 million. Eric Prokopi, a thirty-eight-year-old Floridian, was the man who had brought this extraordinary skeleton to market. A onetime collegiate-level swimmer who spent his teenage years diving for shark teeth, Prokopi's singular obsession with fossils fueled a thriving business hunting, preparing, and selling specimens, to clients ranging from natural history museums to avid private collectors like actors Leonardo DiCaprio and Nicolas Cage. But there was a problem. This time, facing financial strain, had Prokopi gone too far? As the T. bataar went to auction, a

network of paleontologists alerted the government of Mongolia to the eye-catching lot. An international custody battle ensued, and Prokopi watched his own world unravel. In the tradition of *The Orchid Thief*, *The Dinosaur Artist* is a stunning work of narrative journalism about humans' relationship with natural history and a seemingly intractable conflict between science and commerce. A story that stretches from Florida's Land O' Lakes to the Gobi Desert, *The Dinosaur Artist* illuminates the history of fossil collecting--a murky, sometimes risky business, populated by eccentrics and obsessives, where the lines between poacher and hunter, collector and smuggler, enthusiast and opportunist, can easily blur. In her first book, Paige Williams has given readers an irresistible story

that spans continents, cultures, and  
millennia as she examines the  
question of who, ultimately, owns the  
past.
