What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it? In this fascinating, terrifying, instructive and often hilarious book, Bob Garfield of NPR and Ad Age, chronicles the disintegration of traditional media and marketing but also travels five continents to discover how business can survive--and thrive--in a digitally connected, Post-Media Age. He calls this the art and science of Listenomics. You should listen, too.

MANAGEMENT, 12E includes several innovative pedagogical features to help students understand their management capabilities and learn what it's like to manage in an organization today. Each of the 19 chapters begins with an opening questionnaire that engages the reader's interest, directly connects to the topic of the chapter, and enables students to see how they respond to situations and challenges that real-life managers typically face. A New Manager Self-Test in each chapter provides students with further insight into how they would function in the real world of management. The Remember This bullet-point summaries at the end of each major chapter section give students a snapshot of the key points and concepts covered in that section. The end-of-chapter questions have been carefully revised to encourage critical thinking and application of chapter concepts, and Small Group Breakout exercises give students the opportunity to apply concepts while building teamwork skills. Ethical dilemmas, all-new end-of-chapter cases, and a fully updated set of On the Job video cases help students sharpen their diagnostic skills for management problem solving. The chapter sequence in MANAGEMENT is organized around the management functions of planning, organizing, leading, and controlling. These four functions effectively encompass management research and the characteristics of the manager's job. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Tim Noakes is one of the world's leading authorities on the science behind sport and a successful sportsman in his own right. Through a lifetime of research, he has developed key scientific concepts in sport that have not only redefined the way elite athletes and teams approach their professions, but challenged conventional global thinking in these areas. In this new and updated edition of Challenging Beliefs, Noakes shares his views on everything from the myths perpetuated by the sports-drink industry to the prevalence of banned substances, the need to make rugby a safer sport and the benefits of a high-protein, low-carb diet. The teams and athletes with whom Noakes has worked make fascinating backdrops to these topics, highlighting the importance of science in sport in human terms. In providing an intimate look at the golden threads running through Noakes's life and career, this remarkable book reveals the landmark theories and principles generated by one of the greatest minds in the history of sports science.

This new edition of bestselling textbook Introducing Property Valuation provides students with a comprehensive introduction to the concepts and methods of valuing real estate, helping them to progress successfully from basic principles to a more sophisticated understanding. Taking a practically oriented rather than purely theoretical approach, the textbook equips readers with the skills to undertake their own valuation calculations. Fully updated to reflect recent developments in regulation and practice,

experienced tutor and valuer Michael Blackledge demonstrates how the principles can be applied in professional practice in line with the requirements and guidance provided by the International Valuation Standards Council and the Royal Institution of Chartered Surveyors. Online material accompanies the new edition with Q&As and pre-programmed excel spreadsheets enabling students to prepare their own calculations. The five traditional methods of valuation are outlined and the practical applications of the two main approaches, the comparison and investment methods, are fully explored. The use of discounted cash flow and quarterly in advance calculations, topics which are not always adequately covered elsewhere, are also explained. Accessibly written with a full range of worked examples, case studies, clear chapter summaries and extensive further reading suggestions, this book is essential for any student of real estate and its valuation.

The original Getty Museum, housed in a replica of a Roman Villa on a site overlooking the Pacific Ocean, is one of Los Angeles's most treasured landmarks. Closed for almost ten years while renovations were made to the building and the site itself was transformed into a center for the study of antiquities and conservation, the Getty Villa is now set to open late in 2005. The Getty Villa is a lively history of the Getty Museum, its renowned antiquities collections, and its growth from a small museum in a ranch house in Malibu to its first home in a building designed to replicate what we know of the Villa dei Papiri, an ancient Roman villa partially uncovered in Herculaneum. Most engagingly, this book records the ten-year adventure in reconfiguring a beautiful, but topographically challenging, site into one that could continue to accommodate the splendid Museum building and also provide for an outdoor theater, laboratories for conservation work and research, offices for staff and visiting scholars, and an education program for adults and children. This is a story of architectural imagination, geographical challenges, and legal hurdles, all of which have resulted in a truly unique and beautiful site. The story is an enlightening and rewarding one for anyone interested in architecture and in the difficulties posed by building on a grand scale in the twenty-first century. Beautifully illustrated throughout, the book includes 250 reproductions of works of art, photographs of both the old and the new Getty Museum, site plans, and architectural elevations.

Leipzig, Germany, 1722, where Johann Kuhnau, revered organist of the Thomaskirche, suddenly dies, leaving his post vacant. The town council invites musicians from across to audition for the coveted position, among them young Johann Sebastian Bach. In an age where musicians depend on patronage from the nobility or the church to pursue their craft, the post at a prominent church in a cultured city is a near guarantee of fame and fortune - which is why some of the candidates are willing to resort to any lengths to secure it. --

This new volume of The Core Curriculum Series is an indispensable guide for radiology residents' pediatric rotations and an excellent study tool for written boards or recertification exams. Like other volumes of The Core Curriculum Series, the book focuses on one rotation area and covers the essential information readers need to do well on the boards. The book is organized by anatomic system and presents key information about evaluation of various diseases with all current imaging modalities. The user-friendly format includes hundreds of illustrations, margin notes, key review points, chapter outlines, tables, bulleted lists, boxed text, and an easy-to-follow layout. A bound-in image bank CD-ROM contains all the images in the book. Users can view these images as JPG or PDF files, and can copy/paste or export the figures to programs such as PowerPoint.

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

Who doesn't dream of leaving everyday life behind and really experiencing nature with an adventure in the wilderness... and a delicious campfire supper to round off a perfect day? Enjoy the beauty and stillness of breathtaking shots, taken on location in the National Parks of Vancouver and Banff, of the lakes, cascading waterfalls, rivers, canyons, mountains and deep, green, tranquil forests for which Canada is renowned. This is the stunning natural backdrop for recipes and short extracts from Charles Dickens, Margaret Atwood, Chris Czakowski and Anne Michaels inspired by Canada's incredible landscapes. Whether it's fluffy blueberry pancakes with maple syrup, or tender salmon fillet on a cedarwood board, hearty campfire stew with craft beer or the unique national dish of Canada, poutine, these ingredients and recipes evoke bounty, simplicity, campfires and wilderness.

This beloved American holiday classic comes to captivating life as a live 1940s radio broadcast. With the help of an ensemble that brings a few dozen characters to the stage, the story of idealistic George Bailey unfolds as he considers ending his life one fateful Christmas Eve.
