6RA70 Series SIMOREG DC MASTER (Siemens 4th Generation DC Drive) base drive converters are complete drive assemblies ready to be installed and operated. They include a 3-phase armature converter, single-phase field converter, main contactor, protective semiconductor fuses, control power transformer, and power / control terminals.

Siemens SIMOREG 6RA70 DC Master Variable Speed DC Drive
The 6RA70 accepts analog inputs for speed control on X174. Programmable analog outputs on X175 provide meter indication of various drive parameters such as current and voltage. A motor temperature switch can be connected to X174 and is used to stop the drive if the motor becomes overheated. Connections are also available on X173 for a digital tach. 59 Typical Connections The
