The second edition with the addition of permanent values to eradicate crime from the society has made it more thought provoking at the face of sectarianism, extremism, intolerance, terrorism, and corruption: it is revolutionary, opening new vistas and bold horizons of intellectual endeavors. The book is thus a unique attempt at the rediscovery of maintaining Law & Order for permanent values: scholarly written and exquisitely presented.

The forces of globalisation are indiscriminate – they enable those who pursue good and those who pursue evil. The changes brought about by globalisation affect all segments of society, all walks of life, all political parties, all religions, all ethnic groups, and all countries. Sometimes they occur in the most unexpected ways and yield complex results that appear to be mystifying and intractable, at least on the surface. This book describes how the forces of globalisation have descended upon

Karachi and exacerbated local and regional problems to the point where the city is teetering on the brink of chaos. Karachi is geographically, politically, and culturally situated in the context of modern Pakistan, but is a global city affected by global forces, many of which challenge the state 's power and authority. The lessons of Karachi are important for both its present and its future, and they can serve as a cautionary tale for other global cities. Karachi is vitally important to Pakistan. While Islamabad is the country 's capital, Karachi is the most important financial centre in the country. It is the centre of banking, industry, economic activity and trade. Many of Pakistan 's largest corporations are based in Karachi, including entertainment, arts, fashion, medical research, the automotive industry, shipping, textiles, advertising, publishing, and software development. Karachi is also home to Pakistan 's main seaport and two of the largest ports in the region, the Port of Karachi and Port Bin Qasim.

Conceptions of 'sustainable cities' in the pluralistic and multireligious urban settlements of developing nations need to develop out of local cultural, religious and historical contexts to be inclusive and accurately respond to the needs of the poor, ethnic and religious minorities, and women. Religion and Urbanism contributes to an expanded understanding of 'sustainable cities' in South Asia by demonstrating the multiple, and often conflicting ways in which religion enables or challenges socially equitable and ecologically sustainable urbanisation in the region. In particular, this collection focuses on two aspects that must inform the sustainable cities discourse in South Asia: the intersections of religion and urban heritage, and religion and various aspects of informality. This book makes a much-needed contribution to the nexus between religion and urban planning for researchers, postgraduate students and policy makers in Sustainable Development, Development Studies, Urban Studies, Religious Studies, Asian Studies, Heritage Studies and Urban and Religious Geography.

This three-volume Encyclopedia of Law Enforcement provides a comprehensive, critical, and descriptive examination of all facets of law enforcement on the state and local, federal and national, and international stages. This work is a unique reference source that provides readers with informed discussions on the practice and theory of policing in an historical and contemporary framework. The volumes treat subjects that are particular to the area of state and local, federal and national, and international policing. Many of the themes and issues of policing cut across disciplinary borders, however, and several entries provide comparative information that places the subject in context.

Karachi, a mega city of about 25 million now, has been burning since two decades in spreading blaze of target killings, extortion, organised robberies, kidnapping for ransom, sectarian blasts and massive corruption by ruling political regimes. Later, the city became Taliban ' s refuge and a battleground for neighbouring Muslim countries. Since 25 years, nothing has been written about Karachi ' s affairs because of dreadful apprehensions, horror and fears of being eliminated. First time, the two volumes [c 815 pages] of that city ' s complete diary has been compiled to keep the history intact.

Problems of governance in Pakistan are rooted in a persistently unclear and antagonistic relationship among the forces of authority, ideology and ethnicity. Based on theoretical and empirical research this book focuses on significant themes such as the oligarchic state structure dominated by the military and bureaucracy, civil society, Islam and the formation of Muslim identity in British India, constitutional traditions and their subversion by coercive policies, politics of gender, ethnicity, and Muslim nationalism versus regional nationalisms as espoused by Sindhi nationalists and the Karachi-based Muhajir Qaumi Movement (MQM).
