The easiest way to invest in the whole Australian stock market is to invest in a broad market index. This can be done at low cost by using ETFs. On the Australian stock market you find 2 indices, which are tracked by ETFs. Alternatively, you can invest in indices on the Pacific region. In these indices the weight of Australia varies.

How to invest in a cheap ETF As is the case with super funds and savings accounts, there is a direct correlation between high fees and an ETF ' s overall performance. When fees are higher, returns tend to be lower and vice versa. There are two main costs involved when investing in listed funds: the brokerage fees and the management fees.

Exchange Traded Funds (ETFs) in Australia. ETFs are managed funds that trade on the ASX just like ordinary shares. Most ETFs track a benchmark of some sort (e.g. index, sector, commodity etc.) so they are a great way to get exposure to an entire component of the market through one share transaction. As at March 2020 there are 200 ASX listed ETFs from which to choose.

~~List of ASX Exchange Traded Funds (ETFs) – Market Index~~

In Australia, most ETFs are passive investments that don't try to outperform the market. The role of the fund manager is to track the value of: an index, for example the ASX200 or S&P500; a specific commodity, such as gold; The value of the ETF goes go up or down with the index or asset they're tracking.
