Michael Hutchison (1945-2013) researched and wrote about the uses of float- ing for healing, relaxation, meditation, mastery in sports, preparation for courtroom arguments, and more. The new medical research on floating extends these uses -- and confirms the value of Hutchison's overview. The Gateways Books edition also includes the author's unforgettable added memoir of how his own floating experiences were crucial for him after a tragic accident ("The Enlightenment Explanation," chapter 26).

A groundbreaking exploration of the relationship between capitalism, communism, and Arctic ecology since the dawn of the industrial age. Whales and walruses, caribou and fox, gold and oil: through the stories of these animals and resources, Bathsheba Demuth reveals how people have turned ecological wealth in a remote region into economic growth and state power for more than 150 years. The first-ever comprehensive history of Beringia, the Arctic land and waters stretching from Russia to Canada, Floating Coast breaks away from familiar narratives to provide a fresh and fascinating perspective on an overlooked landscape. The unforgiving territory along the Bering Strait had long been home to humans—the Inupiat and Yupik in Alaska, and the Yupik and Chukchi in Russia—before Americans and Europeans arrived with revolutionary ideas for progress. Rapidly, these frigid lands and waters became the site of an ongoing experiment: How, under conditions of extreme scarcity, would the great modern ideologies of capitalism and communism control and manage the resources they craved? Drawing on her own experience living with and interviewing indigenous people in the region, as well as from archival sources, Demuth shows how the social, the political, and the environmental clashed in this liminal space. Through the lens of the natural world, she views human life and economics as fundamentally about cycles of energy, bringing a fresh and visionary spin to the writing of human history. Floating Coast is a profoundly resonant tale of the dynamic changes and unforeseen consequences that immense human needs and ambitions have brought, and will continue to bring, to a finite planet.

Follows the adventures of young Ven, a hobbit-like youth who is eventually befriended by a ship's captain and placed in the care of the captain's wife, an inn-keeper who oversees orphaned charges and an array of eccentric boarders. Reprint.

Cloud Morgan floated from his fevered body, hovering near his bedroom ceiling, but the elusive Old One telepathically sent him back, promising to teach the boy to leave his body at will. Growing up in post-World War II Phoenix, Cloud enjoyed exploring out-of-body, but nightmares of impending tragic events caused him grief. Attending a nudist church eased his mind for a time. Then in college, he saw an enchanting dancer from the East in a dream so vivid he felt compelled to search for her. Two beautiful women with psychic gifts matched the image in Cloud's dream: the reluctant seer Xuan in Saigon, and in New Jersey, Terp, the brilliant scholar who could heal others yet not herself. Both women saw Cloud in visions. Both held profound power to shape his life. But which one was the enchanting dancer from the East?

From paintings and food to illness and icebergs, science is happening everywhere. Rather than follow the path of a syllabus or textbook, Andrew Morris takes examples from the science we see every day and uses them as entry points to explain a number of fundamental scientific concepts - from understanding colour to the nature of hormones - in ways that anyone can grasp. While each chapter offers a separate story, they are linked together by their fascinating relevance to our daily lives. The topics explored in each chapter are based on hundreds of discussions the author has led with adult science learners over many years - people who came from all walks of life and had no scientific training, but had developed a burning curiosity to understand the world around them. This book encourages us to reflect on our own relationship with science and serves as an important reminder of why we should continue learning as adults.

While trying to cross a moat, Archimedes the Goat and Skinny the Hen learn why objects sink or float. By the author of The Curious Demise of the Contrary Cat and the illustrator of Itsy-Bitsy Baby Mouse.

Throughout my life I have been goal orientated and always on the go, always looking for the next level, never felt settled and comfortable, always setting the next goal as soon as the current one nears completion, pushing myself all the time, so with this I felt myself under pressure most of the time and with that comes stress and the complaints of never having enough time. I was like burning the candles on both ends, and come to reality that this was life entailed. This has resulted in me writing this book. I discovered that regular floating made me a healthier and happier person, I said goodbye to a stressful lifestyle, under exercising and reinforced my body's capacity for happier thoughts, healing, good sleep, stimulating and sharpening my mind.

On the island of Koh Panyee, in a village built on stilts, there is no open space. How will a group of Thai boys play soccer? After watching the World Cup on television, a group of Thai boys is inspired to form their own team. But on the island of Koh Panyee, in a village built on stilts, there is no open space. The boys can play only twice a month on a sandbar when the tide is low enough. Everything changes when the teens join together to build their very own floating soccer field. This inspiring true story by debut author Scott Riley is gorgeously illustrated by Nguyen Quang and Kim Lien. Perfect for fans of stories about sports, beating seemingly impossible odds, and places and cultures not often shown in picture books. "A compelling book for football [soccer] fans and readers seeking examples of ingenuity."—starred, Publishers Weekly

Introduces the concepts of floating and sinking by following a fictional captain on the high seas who wonders why his boat floats and his treasure sinks.
