The Lunar Men: The Inventors of the Modern World 1730-1810 ...

Chief instigator of the Lunar society was Erasmus Darwin, an amiable man who managed to get rich doing his rounds as a doctor as well as inventing what we now (wrongly) call Ackermann steering, as used on all modern vehicles, a copying machine, and a speaking machine.

The Lunar Men : A Story of Science, Art, Invention and ...

The Lunar Men: The Inventors of the Modern World, 1730 – 1810. Led by Erasmus Darwin, the Lunar Society of Birmingham was formed from a group of amateur experimenters, tradesmen and artisans who met and made friends in the Midlands in the 1760s. Most came from humble families, all lived far from the centre of things, but they were young and their optimism was boundless: together they would change the world.

The Lunar Men: The Friends Who Made the Future 1730-1810 ...

The Lunar Society of Birmingham was a British dinner club and informal learned society of prominent figures in the Midlands Enlightenment, including industrialists, natural philosophers and intellectuals, who met regularly between 1765 and 1813 in Birmingham. At first called the Lunar Circle, "Lunar Society" became the formal name by 1775. The name arose because the society would meet during ...

Lunar Society of Birmingham - Wikipedia

The Lunar Men is a collaborative and interactive performance piece centred around the extraordinary characters of the Lunar Society, a group of dynamic inventors, experimenters, and philosophers of the Eighteenth Century. Their story is interwoven with exquisite and comic folk tales, combining Maria ' s rich and eloquent storytelling and Sarah ' s responsive musicianship and singing.

life Erasmus Darwin, physician, poet, inventor and theorist of evolution (a forerunner of his grandson Charles). Later came Joseph Priestley, discoverer of oxygen and fighting radical." "With a small band of allies, including the exuberant followers of Rousseau, Richard Lovell Edgeworth and Thomas Day, they formed the Lunar Society of Birmingham (so called because it met at each full moon). Blending science, art and commerce, the Lunar Men built canals, launched balloons, named plants, gases and minerals, changed the face of England and the china in its drawing rooms, and plotted to revolutionize its soul." --Book Jacket.

Chronicles the friendships of Matthew Boulton, James, Watt, Josiah Wedgwood, Erasmus Darwin, and Joseph Priestly, whose ideas and experiments launched the Industrial Revolution. Reprint. 15,000 first printing.

Industrial Revolution.

Scottish inventor and mechanical engineer James Watt (1736 – 1819) is best known for his pioneering work on the steam engine that became fundamental to the incredible changes and developments wrought by the Industrial Revolution. But in this new biography, Ben Russell tells a much bigger, richer story, peering over Watt ' s shoulder to more fully explore the processes he used and how his ephemeral ideas were transformed into tangible artifacts. Over the course of the book, Russell reveals as much about the life of James Watt as he does a history of Britain ' s early industrial transformation and the birth of professional engineering. To record this fascinating narrative, Russell draws on a wide range of resources—from archival material to three-dimensional objects to scholarship in a diversity of fields from ceramics to antique machine-making. He explores Watt ' s early years and interest in chemistry and examines Watt ' s partnership with Matthew Boulton, with whom he would become a successful and wealthy man. In addition to discussing Watt ' s work and incredible contributions that changed societies around the world, Russell looks at Britain ' s early industrial transformation. Published in association with the Science Museum London, and with seventy illustrations, James Watt is not only an intriguing exploration of the engineer ' s life, but also an illuminating journey into the broader practices of invention in the eighteenth and early nineteenth centuries. Published in association with the Science Museum, London

Discusses James Watt's development of the separate condenser steam engine, a key step in making steam a practical industrial power source and the creation of Watt's image as an icon of industrial efficiency.

When penniless businessman Mr Bedford retreats to the Kent coast to write a play, he meets by chance the brilliant Dr Cavor, an absent-minded scientist on the brink of developing a material that blocks gravity. Cavor soon succeeds in his experiments, only to tell a stunned Bedford the invention makes possible one of the oldest dreams of humanity: a journey to the moon. With Bedford motivated by money, and Cavor by the desire for knowledge, the two embark on the expedition. But neither are prepared for what they find - a world of freezing nights, boiling days and sinister alien life, on which they may be trapped forever.

Tom Swift and His Electric Rifle is the tenth book in the original Tom Swift series. "Every boy possesses some form of inventive genius. Tom Swift is a bright, ingenious boy and his inventions and adventures make the most interesting kind of reading." "These spirited tales convey in a realistic way, the wonderful advances in land and sea locomotion and other successful inventions. Stories like these are impressed upon the memory and their reading is productive only of good." Tom Swift is the young protagonist in this series of juvenile adventure novels which began in
