Due to the economic significance of technological innovations, the Chief Information Officer (CIO) has been gathering prominence as an executive. His or her role is characterised by ambiguity and subject to research endeavours for 30 years. Nonetheless, the current research about CIOs' leadership models is quite limited. This thesis fills this gap. Based on reports about CIOs' action and their role characteristics, three unifying leadership models can be derived: Resource based leadership, transformational leadership, and strategic leadership. A resource based CIO leads his/her subordinates, guided by cost effectiveness. The transformational CIO leads with the help of his/her executive

peers, by closely monitoring the external environment and collaboratively changing the IT infrastructure, over time. The strategic CIO leads by setting the business agenda of the organization, alternating the business model with the help of IT. If applied successfully, these leadership models can yield positive outcomes for the organizations, such as competitive advantages. Contingently, certain prerequisites must be in place. The organization's maturity for technological reforms, and perceived relevance of IT for the organizations business model need to match the leadership model.

This book describes how chief information officers (CIOs) can embrace and drive the digital transformation by providing innovative leadership that uses old skills in a novel way. The book explores ways in which new actors and factors will play a key role in this process and how new relations can be created among things, data, and people. In addition, the design of digital organizations and the implementation of digital technologies are carefully examined and it is explained how digital workspaces can be designed, organized, and used. A set of methods is provided for linking new digital tools in order to meet the goals and
