What different kinds of reason are possible, and which ones are the most appropriate for a legitimate, as opposed to a merely legitimated state? The book opens with an analysis of Weber as a figure who marks a key moment of sociological transition. Weber articulates a distinctly different view to Enlightenment thinkers who believe in the capacity of reason to improve society and emancipate humanity from ignorance and domination. Weber signals that the institutionalization of the

instrumental reason particular to industrial society might actually be an effective tool in the struggle for social supremacy. He notes that in comparison with charismatic and traditional legitimation, modern forms of legal-rational legitimation are de-personalised, anonymously bureaucratic, and much more difficult to combat. The book then looks at various responses to Weber's diagnosis, from Lukács and Benjamin to Horkheimer, Adorno, Heidegger, Arendt, Simmel, Foucault and Habermas. The study culminates with a sociological reading of critical theory that draws together Adorno's concept of non-identity with Habermas on communicative reason and Luhmann on social complexity and differentiation.

Postmodernism may seem a particularly inappropriate term when used in conjunction with a region that is usually thought of as having only recently, and then unevenly, acceded to modernity. Yet in the last several years the concept has risen to the top of the agenda of cultural and political debate in Latin America. This collection explores the Latin American engagement with postmodernism, less to present a regional variant of the concept than to situate it in a transnational framework. Recognizing that postmodernism in Latin America can only inaccurately be thought of as having traveled from an advanced capitalist "center" to arrive at a still dependent neocolonial "periphery," the contributors share the assumption that postmodernism is

itself about the dynamics of interaction between local and metropolitan cultures in a global system in which the center-periphery model has begun to break down. These essays examine the ways in which postmodernism not only designates the effects of this transnationalism in Latin America, but also registers the cultural and political impact on an increasingly simultaneous global culture of a Latin America struggling with its own set of postcolonial contingencies, particularly the crisis of its political left, the dominance of neoliberal economic models, and the new challenges and possibilities opened by democratization. With new essays on the dynamics of Brazilian culture, the relationship between postmodernism and Latin American

To what extent do indie masculinities challenge the historical construction of rock music as patriarchal? This key question is addressed by Matthew Bannister, involving an in-depth examination of indie guitar rock in the 1980s as the culturally and historically specific production of white men. Through textual analysis of musical and critical discourses, Bannister provides the first book-length study of masculinity and ethnicity within the context of indie guitar music within US, UK and New Zealand 'scenes'. Bannister argues that past theorisations of (rock) masculinities have tended to set up

varieties of working-class deviance and physical machismo as 'straw men', oversimplifying masculinities as 'men behaving badly'. Such approaches disavow the ways that masculine power is articulated in culture not only through representation but also intellectual and theoretical discourse. By re-situating indie in a historical/cultural context of art rock, he shows how masculine power can be rearticulated through high, avant-garde, bohemian culture and aesthetic theory: canonism, negation (Adorno), passivity, voyeurism and camp (Andy Warhol and the Velvet Underground), and primitivism and infantilism (Lester Bangs, Simon Reynolds). In a related vein, he also assesses the impact of Freud on cultural theory, arguing that reversing binary

conceptions of gender by associating masculinities with an essentialised passive femininity perpetuates patriarchal dualism. Drawing on his own experience as an indie musician, Bannister surveys a range of indie artists, including The Smiths, The Jesus and Mary Chain, My Bloody Valentine and The Go-Betweens; from the US, R.E.M., The Replacements, Dinosaur Jr, Hüsker Dü, Nirvana and hardcore; and from NZ, Flying Nun acts, including The Chills, The Clean, the Verlaines, Chris Knox, Baiter Space, and The Bats, demonstrating broad continuities between these apparently disparate scenes, in terms of gender, aesthetic theory and approaches to popular musical history. The result is a book which raises some important questions about how gender is studied in

Drawing on both analytical and continental traditions, this thought-provoking book takes a balanced look at the contributions philosophy can make to improving our understanding of what it means to organize. The essays consider three areas: representing organization, knowing organization, and the becoming of organization. With originality and flair, the contributors make a powerful case for the need for a new philosophy of management and organization.

In this exciting new study, Eugene Gogol interweaves three strands that

form the intellectual bedrock for the concept of the Other in the Latin American context: Hegel's dialectic of negativity, Marx's humanism, and autochthonal emancipatory thought. From this foundation, the book explores the relation of liberatory philosophic thought to today's social and class movements. Gogol considers the logic of capitalism on Latin American soil, the ecological crisis in Latin America, and the concept and practice of self-liberation. Still one of the most contested terrains of Latin American thought, the Other has been of central concern for many luminary thinkers including Leopoldo Zea, Octavio Paz, and JosZ Carlos MariOtegui. While these writers may not garner much publicity in the world press, the highly public and
