An insider's view of the most successful show in the history of TV, 60 Minutes. The most popular TV show in America isn't American Idol, and it's not Survivor. Month in, month out, the most-watched program in America is 60 Minutes, drawing a staggering 25 million viewers in an average week. For its entire 34-year history, 60 Minutes was the brainchild (and personal fiefdom) of Don Hewitt, the take-no-prisoners visionary who hustled the show into being and kept it afloat with a mixture of chutzpah, tough talk, scheming, and journalistic savvy. But now that Hewitt is 80 and grudgingly considering retirement, the show's direction is increasingly up for grabs, and the transition will surely be marked by some serious fireworks. As author David Blum provides a fly-on-the-wall perspective on the show's upheavals, he'll also trace its past; although the show has aired some 5,000 pieces and has made household names of Mike Wallace, Ed Bradley, Leslie Stahl, and Morley Safer, much of the backstage story—the passionate pursuit of stories, the behind-the-scenes wrangling, and the stars' prima donnish behavior—has gone untold. With full access to the producers, stars, and executives, Blum will give readers an unprecedented view of the personalities and events that have shaped 60 Minutes – and a new perspective on how current events become news.

Examines the work of Michael Mann, Hollywood director through a critical study of his film style and its relationship to genre, film criticism, auteurism, and historical context. This book covers Mann's filmography, from his beginning in television to his film adaptation of the television series "Miami Vice".

Michael Mann first made his mark as a writer for such television programs as *Starsky and Hutch*, *Police Story*, and *Vegas*. In 1981 he made his feature film directing debut with the James Caan thriller *Thief*, and in the 1980s he served as a writer and executive producer for the groundbreaking programs *Miami Vice* and *Crime Story*. Though he has delved into other genres, Mann's career as a writer, producer, and director has consistently focused on criminal activity, from small-time hoods and professional thieves to corporate manipulators and serial killers. In *Michael Mann: Crime Auteur*, Steven Rybin looks at the television programs and films that Mann has stamped with his personal signature. This book closely examines the themes and techniques used in films such as *Manhunter*, *Heat*, *The Insider*, and *Collateral* and connects these elements to his work on the non-genre films *The Last of the Mohicans* and *Ali*. A revised and significantly expanded edition of *The Cinema of Michael Mann* (2007), this book includes new chapters on *Public Enemies* and the big screen version of *Miami Vice*, as well as Mann's work on the shows *Crime Story* and *Luck*. Covering Mann's entire career, this book will be of interest to fans of the writer/director's body of work as well as to scholars of both film and television.

James J. Kilpatrick was a nationally known television personality, journalist, and columnist whose conservative voice rang out loudly and widely through the twentieth century. As editor of the *Richmond News Leader*, writer for the *National Review*, debater in the "Point/Counterpoint" portion of CBS's *60 Minutes*, and supporter of conservative political candidates like Barry Goldwater, Kilpatrick had many platforms for his race-based brand of southern conservatism. In *James J. Kilpatrick: Salesman for Segregation*, William Hustwit delivers a comprehensive study of Kilpatrick's importance to the civil rights era and explores how his protracted resistance to both desegregation and egalitarianism culminated in an enduring form of conservatism that revealed a nation's unease with racial change. Relying on archival sources, including Kilpatrick's personal papers, Hustwit provides an invaluable look at what Gunnar Myrdal called the race problem in the "white mind" at the intersection of the postwar conservative and civil rights movements. Growing out of a painful family history and strongly conservative political cultures, Kilpatrick's personal values and self-interested opportunism contributed to America's ongoing struggles with race and reform.

Donald Trump's presidency was marked by angry attacks on journalists, an extraordinary ability to capture the media spotlight, a flood of disinformation from the White House, and bitter partisanship reflected in the media. Trump's dysfunctional relationship with the press affected how the United States dealt with the crises of COVID-19, climate change, social unrest due to systemic racism, and efforts to overturn the 2020 election. But Trump's troubled relationship with the press didn't happen by chance. *Clash* explores the political, economic, social, and technological forces that have shaped the relationship between U.S. presidents and the press during times of crisis. In addition to Trump's presidency, *Clash* examines those of John Adams, Abraham Lincoln, Woodrow Wilson, Franklin Roosevelt, Richard Nixon, Ronald Reagan, Bill Clinton, George W. Bush, and Barack Obama. Some of these presidents faced military or international crises. Others were challenged by economic downturns or political scandals. And sometimes the survival of America's system of government was at stake. By examining what happened between presidents and the press during these pivotal times, *Clash* helps us understand how we arrived at our current troubled state of affairs. It concludes with recommendations for strengthening the role the press plays in keeping presidents accountable.

Ever since Newton Minow taught us sophisticates to bemoan the descent of television into a vast wasteland, the dyspeptic chorus of jeremiahs who insist that television news in particular has gone from gold to dross gets noisier and noisier. Charles Ponce de Leon says here, in effect, that this is misleading, if not simply fatuous. He argues in this well-paced, lively, readable book that TV news has changed in response to broader changes in the TV industry and

American culture. It is pointless to bewail its "decline." That's the Way It Is gives us the very first history of American television news, spanning more than six decades, from "Camel News Caravan" to "Countdown with Keith Oberman" and "The Daily Show." Starting in the latter 1940s, television news featured a succession of broadcasters who became household names, even presences: Eric Sevareid, Walter Cronkite, David Brinkley, Peter Jennings, Brian Williams, Katie Couric, and, with cable expansion, people like Glenn Beck, Jon Stewart, and Bill O'Reilly. But behind the scenes, the parallel story is just as interesting, involving executives, producers, and journalists who were responsible for the field's most important innovations. Included with mainstream network news programs is an engaging treatment of news magazines like 60 Minutes and 20/20, as well as morning news shows like Today and Good Morning America. Ponce de Leon gives ample attention to the establishment of cable networks (CNN, and the later competitors, Fox News and MSNBC), mixing in colorful anecdotes about the likes of Roger Ailes and Roone Arledge. Frothy features and other kinds of entertainment have been part and parcel of TV news from the start; viewer preferences have always played a role in the evolution of programming, although the disintegration of a national culture since the 1970s means that most of us no longer follow the news as a civic obligation. Throughout, Ponce de Leon places his history in a broader cultural context, emphasizing tensions between the "public service" mission of TV news and the quest for profitability and broad appeal.

The Vietnam War (1964–1975) divided American society like no other war of the twentieth century, and some of the most memorable American art and art-related activism of the last fifty years protested U.S. involvement. At a time when Pop Art, Minimalism, and Conceptual Art dominated the American art world, individual artists and art collectives played a significant role in antiwar protest and inspired subsequent generations of artists. This significant story of engagement, which has never been covered in a book-length survey before, is the subject of Kill for Peace. Writing for both general and academic audiences, Matthew Israel recounts the major moments in the Vietnam War and the antiwar movement and describes artists' individual and collective responses to them. He discusses major artists such as Leon Golub, Edward Kienholz, Martha Rosler, Peter Saul, Nancy Spero, and Robert Morris; artists' groups including the Art Workers' Coalition (AWC) and the Artists Protest Committee (APC); and iconic works of collective protest art such as AWC's Q. And Babies? A. And Babies and APC's The Artists Tower of Protest. Israel also formulates a typology of antiwar engagement, identifying and naming artists' approaches to protest. These approaches range from extra-aesthetic actions—advertisements, strikes, walk-outs, and petitions without a visual aspect—to advance memorials, which were war memorials purposefully created before the war's end that criticized both the war and the form and content of traditional war memorials.

Bob Woodward and Carl Bernstein exemplify an era when investigative reporters were seen as courageous fighters of corruption and injustice. Their epoch-making expose of the Watergate conspiracy not only contributed to the resignation of President Richard M. Nixon but also set the standard to which successive generations of investigative reporters have aspired. In Watergate's Legacy and the Press, John Marshall recounts this captivating story and details the complex ways in which the press and American government have reshaped themselves in its wake. Marshall's thorough understanding of the history of these institutions gives rise to insights regarding present and future challenges. Although many mainstream reporting. Marshall finds hope in the opportunities offered by blogs, crowdsourcing, and nonprofit institutions. The result of painstaking research and scholarship, Watergate's Legacy and the Press is ultimately a tribute to the irrepressible investigative impulse in American journalism and the crucial public service provided by investigative reporters.

in book that looks at how technology has changed the journalistic landscape. By the coauthor of *The Online Journalist*. Original.

Loren Ghiglione recounts the fascinating life and tragic suicide of Don Hollenbeck, the controversial newscaster who became a primary target of McCarthyism's smear tactics. Drawing on unsealed FBI records, private family correspondence, and interviews with Walter Cronkite, Mike Wallace, Charles Collingwood, Douglas Edwards, and more than one hundred other journalists, Ghiglione writes a balanced biography that cuts close to the bone of this complicated newsman and chronicles the stark consequences of the anti-Communist frenzy that seized America in the late 1940s and 1950s. Hollenbeck began his career at the Lincoln, Nebraska Journal (marrying the boss's daughter) before becoming an editor at William Randolph Hearst's rip-roaring Omaha Bee-News. He participated in the emerging field of photojournalism at the Associated Press; assisted in creating the innovative, ad-free PM newspaper in New York City; reported from the European theater for NBC radio during World War II; and anchored television newscasts at CBS during the era of Edward R. Murrow. Hollenbeck's pioneering, prize-winning radio program, *CBS Views the Press* (1947-1950), was a declaration of independence from a print medium that had dominated American newsmaking for close to 250 years. The program candidly criticized the prestigious New York Times, the Daily News (then the paper with the largest circulation in America), and Hearst's flagship Journal-American and popular morning tabloid Daily Mirror. For this honest work, Hollenbeck was attacked by conservative anti-Communists, especially Hearst columnist Jack O'Brian, and in 1954, plagued by depression, alcoholism, three failed marriages, and two network firings (and worried about a third), Hollenbeck took his own life. In his investigation of this amazing American character, Ghiglione reveals the workings of an industry that continues to fall victim to censorship and political manipulation. Separating myth from fact, CBS's Don Hollenbeck is the definitive portrait of a polarizing figure who became a symbol of America's tortured conscience.
