Time of useful consciousness (TUC), also effective performance time (EPT), is defined as the amount of time an individual is able to perform flying duties efficiently in an environment of inadequate oxygen supply.

Time of useful consciousness - Wikipedia

The Time of Useful Conciousness (TUC) or Effective Performance Time is the period of elapsed time from the interruption of normal air supply or exposure to an oxygen-poor environment until the time when the ability to function usefully is likely to be lost at which point an affected individual would no longer be capable of taking normal corrective or protective action.

It's deep history, jazzy, radical. Ferlinghetti says that "'Time of useful consciousness' is an aeronautical term denoting the time between when one loses oxygen and when one passes out, the brief time in which some lifesaving action is possible." And I say poetry, at its best, is always a lifesaving, radical action.

Time of Useful Consciousness by Lawrence Ferlinghetti

The time of useful consciousness or TUC (the period from the exposure to an O2-deprived environment, to the time when useful function is lost) at FL280 is roughly three minutes. A loud bang and flying papers

Time of useful consciousness - WikiMilli, The Free Encyclopedia

"Time of Useful Consciousness is a fragmented recording of the American stream-of-consciousness, always westward streaming, a people's poetic history in the tradition of William Carlos Williams' Paterson, Charles Olson's Maximus, Allen Ginsberg's Fall of America, and Ed Sanders' America: A History in Verse."

Time of Useful Consciousness - GRAPHITE

Time of Useful Consciousness by Jennifer Ott is a post-World War II drama set in Allied-occupied Germany. Louisa Unger is caught in a world of secrets and when she's arrested for murder, a U.S. colonel urges her to tell her story for her freedom. She must decide if she will give up the names of her countrymen for her freedom.
