In the 1950s and '60s the British motorcycle industry was at its postwar peak, with its large-capacity high-

performance bikes in strong demand all over the world. AJS/Matchless, BSA, Norton, Royal Enfield and Triumph were all making 100mph-plus big twins, with the king of them all, at least into the 1950s, being the mighty 1000cc Vincents, while among the ton-up singles were the BSA Gold Star and the Velocette Venom and Thruxton. In this book veteran motorcycle writer Steve Wilson reviews the top-of-the-line bikes of all these manufacturers, first giving an introduction to the motorcycling scene in the period, with a particular look at the emergence of the Rockers, the black-leather too-fast-to-live-too-young-to-die bikers who developed a culture all their own, inspired indirectly by Marlon Brando behaving badly on his Triumph Thunderbird in

the banned-in-Britain 1953 movie *The Wild One*. Then the motorcycle makers are dealt with alphabetically, with their big bikes described in detail and their performance, handling, strengths and weaknesses discussed. In addition to a wide selection of archive photographs, specially commissioned colour photography features examples of the outstanding bikes of the period: AMC/Matchless CSR 650 twins and their Norton Atlas-engined 'Hybrid' siblings, BSA A7SS 500, Gold Star singles, AIO Super Rocket and Rocket Gold Star 650 twins, Norton SS 500/600/650 twins, Velocette Venom and Thruxton 500, Royal Enfield Constellation 700 twin, Triumph pre-unit 500 and 650 twins and unit Bonneville 650, and finally the Vincent

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge

how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit,

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your

muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
